Prajjwal Mishra

Lead ICC Monitoring & Command Center Systems Specialist | ICC Monitoring Engineer

Email: **prajjwal.icc@talentpilot-demo.ai** | Phone: +1 (555) 724-1189 | Location: Dallas, TX (Hybrid / Remote)

PROFESSIONAL SUMMARY

Enterprise Command Center and Infrastructure Telemetry Specialist with 6+ years driving 24x7 Integrated Command Center (ICC/NOC) surveillance, automated incident response, and end-to-end observability across distributed cloud and on-premise infrastructure. Expert in Prometheus, Grafana, Dynatrace, Splunk, and ServiceNow Event Management, orchestrating rapid P1/P2 triage, SLA compliance, telemetry noise filtering, and high-availability operations.

TECHNICAL PROFICIENCIES & CORE SKILLS

Telemetry & Observability: Prometheus, Grafana, Dynatrace, Splunk Enterprise, Nagios Core, Datadog, Zabbix, Elastic Stack (ELK)

Incident & Event Management: ServiceNow Event Management, PagerDuty, Opsgenie, ITIL v4 Incident & Problem Lifecycle, Major Incident Management (MIM)

Infrastructure Surveillance: Enterprise Server Racks, VMware vSphere, SAN/NAS Storage arrays, Cisco ACI, Network Core Switches, AWS CloudWatch, Azure Monitor

Automation & Scripting: Python 3, Bash / Shell Scripting, Webhooks, REST APIs, Ansible Automation, Automated Runbook Execution

Governance & Metrics: 24x7 Shift Handover, MTTR & MTBF Optimization, SLA Auditing, Root Cause Analysis (RCA), Blameless Postmortems

PROFESSIONAL EXPERIENCE

Lead ICC Monitoring & Telemetry Engineer | *Vanguard Telecom & Cloud Infrastructure* (2022 - Present)

- Direct 24x7 Integrated Command Center operations across 3 geo-distributed enterprise datacenters, supervising real-time telemetry for 4,200+ physical and virtual host nodes.
- Architected 40+ high-definition Grafana and Dynatrace telemetry dashboards, correlating network throughput, CPU/memory threshold spikes, and service latency in real time.
- Engineered automated event suppression and alert deduplication rules in Splunk and ServiceNow, reducing alert noise by 64% and eliminating operator fatigue.
- Command live P1/P2 critical outage bridges with cross-functional network, database, and platform engineering teams, reducing Mean Time to Resolution (MTTR) from 38 minutes to under 14 minutes.
- Designed webhook-based automated remediation workflows triggering self-healing runbooks for transient memory leaks, service restarts, and disk space reclamation.

Infrastructure Monitoring & NOC Specialist | *Apex Enterprise Systems* (2018 - 2022)

- Monitored mission-critical banking transactions, payment gateways, and network backbones using Nagios, Zabbix, and Prometheus with 99.995% SLA adherence.
- Conducted automated hourly health checks, synthetic availability runs, and capacity forecasting reports delivered to executive leadership.
- Authored 25+ comprehensive Standard Operating Procedures (SOPs) and disaster recovery runbooks adopted by all ICC shift operators and incident response squads.

CERTIFICATIONS & ACCREDITATIONS

ITIL v4 Foundation / Managing Professional Certified • Splunk Enterprise Certified Power User • Dynatrace Associate Observability Certification

EDUCATION

B.Tech in Electronics & Telecommunication Engineering, National Institute of Technology (2018)
