Vaishnavi Kulkarni

Lead ServiceNow Platform Engineer & Workflow Architect | ServiceNow Engineer

Email: **vaishnavi.servicenow@talentpilot-demo.ai** | Phone: +1 (555) 912-6348 | Location: San Jose, CA (Hybrid / Remote)

PROFESSIONAL SUMMARY

ServiceNow Platform Engineer and Implementation Specialist with 6+ years designing, developing, and architecting enterprise workflow solutions across ITSM, ITOM, CMDB, and Custom Applications. Proven track record configuring complex GlideScript business logic, Flow Designer automations, IntegrationHub spokes, Service Catalog items, and automated REST integrations with third-party enterprise platforms.

TECHNICAL PROFICIENCIES & CORE SKILLS

ServiceNow Suites: ITSM (Incident, Problem, Change, Request, Knowledge), ITOM (Discovery, Service Mapping, Event Management), ITAM, Service Portal

Platform Scripting: GlideRecord, GlideSystem, GlideAjax, Script Includes, Business Rules, Client Scripts, UI Policies, UI Actions, Widget development

Integration & Automation: IntegrationHub, Flow Designer, REST / SOAP Web Services, Import Sets, Transform Maps, MID Server clusters, Webhooks

Data & Architecture: CMDB Health (Completeness, Correctness, Compliance), Identification & Reconciliation Engine (IRE), CSDM 4.0 framework

Development Lifecycle: Automated Test Framework (ATF), Update Sets, Scoped Applications, Studio, Agile/Scrum, Git integration, Performance Profiler

PROFESSIONAL EXPERIENCE

Lead ServiceNow Platform Engineer | *Enterprise Cloud Innovations Inc.* (2022 - Present)

- Architect enterprise ServiceNow Vancouver/Washington instance supporting 28,000 internal users and 1,200 fulfillment agents across 14 business departments.
- Engineered 85+ reusable Script Includes, asynchronous Business Rules, and client-side GlideAjax scripts, reducing server-side execution latency by 38%.
- Modernized legacy workflow engines into modular ServiceNow Flow Designer flows with custom IntegrationHub spokes connecting to Jira, Slack, Azure AD, and AWS.
- Led CMDB maturation project utilizing ServiceNow Discovery and IRE pipelines, boosting CMDB accuracy score from 68% to 96.4% across 85,000 Configuration Items (CIs).
- Built custom responsive Service Portal widgets using AngularJS, HTML5, and Bootstrap with self-service request catalogs handling 4,500 daily requests.
- Implemented comprehensive Automated Test Framework (ATF) suites covering 90% of core change and incident workflows, cutting regression testing cycles by 70%.

ServiceNow Implementation Consultant | *Global Digital Workflows Inc.* (2018 - 2022)

- Delivered end-to-end ITSM implementations, custom notification engines, and complex approval matrixes for Fortune 500 financial clients.
- Configured MID Server clusters across secure network enclaves for automated SNMP/WMI infrastructure discovery.
- Executed 4 platform family upgrades (Kingston through Rome) with zero unplanned downtime and minimal rollback issues.
