Abhinav Rao

Senior Site Reliability Engineer (SRE)

Email: **abhinavclouds@gmail.com** | Phone: +1 (555) 902-4418 | Location: Seattle, WA (Remote)

PROFESSIONAL SUMMARY

Principal Site Reliability Engineer with 7+ years optimizing system resilience, defining SLOs/SLIs, and leading incident response for mission-critical enterprise systems. Passionate about chaos engineering and reducing operational toil through automated remediation.

TECHNICAL PROFICIENCIES

Key Skills: SLO / SLI Design ? Incident Management ? Chaos Engineering ? Python ? Go ? OpenTelemetry ? Datadog ? Prometheus ? Kubernetes ? Linux Kernel Tuning ? eBPF

PROFESSIONAL EXPERIENCE

Senior SRE / Observability Lead | *HyperScale Fintech* (2021 - Present)

- ? Formulated and implemented company-wide SLO/SLI error budget frameworks across 35 microservices.
- ? Conducted monthly chaos engineering game days (Chaos Mesh / Gremlin) to validate automated failover resilience.
- ? Engineered automated remediation bot in Python that resolved 42% of recurring alerts without human paging.
- ? Spearheaded distributed tracing rollout using OpenTelemetry and Datadog, cutting mean time to detect (MTTD) by 60%.

Systems Reliability Engineer | *Streamline Networks* (2018 - 2021)

- ? Managed 24/7 on-call rotation for distributed streaming platforms with strict 99.995% reliability requirements.
- ? Optimized Linux TCP/IP network kernel parameters to resolve high socket churn during flash traffic spikes.

EDUCATION

B.S. in Computer Systems Engineering, University of Washington (2018)
