Abhinav Verma

Principal Data Platform & Streaming Engineer

Email: **abhinavclouds@gmail.com** | Phone: +1 (555) 833-9012 | Location: Chicago, IL (Remote)

PROFESSIONAL SUMMARY

Principal Data Engineer with 9+ years architecting enterprise real-time streaming platforms, modern data stacks, and petabyte-scale analytical lakehouses. Expert in Apache Flink, Kafka, Snowflake, Spark, and dbt.

TECHNICAL PROFICIENCIES

Key Skills: Apache Kafka ? Apache Flink ? Apache Spark ? Python ? SQL ? Snowflake ? dbt ? Airflow ? Delta Lake ? Data Modeling ? Streaming ETL ? Great Expectations

PROFESSIONAL EXPERIENCE

Principal Data Platform Architect | *Kinetix Data Systems* (2022 - Present)

- ? Architected unified real-time streaming data ingestion engine processing 2.4 billion daily events using Apache Flink and Kafka.
- ? Designed petabyte-scale Snowflake modern data warehouse and modular dbt transformation DAGs serving 500+ analytical users.
- ? Built automated data quality observability platform with Great Expectations, preventing corrupt pipeline ingestion.
- ? Optimized Snowflake warehouse sizing, query clustering keys, and materialized views, decreasing monthly compute costs by $45,000.

Senior Data Infrastructure Engineer | *OmniStream Analytics* (2017 - 2022)

- ? Built batch and streaming ETL jobs in PySpark on AWS EMR processing 50TB daily logs.
- ? Orchestrated complex enterprise workflow dependencies using Apache Airflow with custom sensors and SLA monitoring.

EDUCATION

B.S. in Information Systems, University of Illinois Urbana-Champaign (2017)
