Abhinav S.

Cloud Security & DevOps Platform Lead

Email: **abhinavclouds@gmail.com** | Phone: +1 (555) 712-3456 | Location: Austin, TX (Remote)

PROFESSIONAL SUMMARY

DevOps and Cloud Security Platform Lead with 9 years architecting resilient multi-cloud foundations on AWS and GCP. Deep expertise in Terraform, Kubernetes cluster hardening, Zero Trust network architecture, and SOC2 / ISO-27001 compliance automation.

TECHNICAL PROFICIENCIES

Key Skills: Kubernetes • Docker • Terraform • AWS • GCP • Zero Trust • Istio Service Mesh • GitHub Actions CI/CD • Vault • Linux Internals • SOC2 Compliance • Prometheus

PROFESSIONAL EXPERIENCE

Head of Platform & Cloud Infrastructure | *Fortress Cloud Security* (2021 - Present)

- Designed and automated multi-region AWS EKS Kubernetes infrastructure with Terraform and GitOps (ArgoCD) achieving 99.99% uptime SLA.
- Enforced Zero Trust security posture with mTLS service-to-service communication using Istio and HashiCorp Vault dynamic secrets.
- Constructed hardened CI/CD deployment pipelines with automated container vulnerability scanning (Trivy), reducing deployment lead time from days to 14 minutes.
- Directed SOC2 Type II compliance audit, successfully certifying identity governance, audit logging, and cryptographic data isolation.

Senior Cloud Infrastructure Engineer | *Apex Cloud Systems* (2016 - 2021)

- Engineered automated blue-green zero-downtime deployment workflows for 60+ microservices.
- Implemented centralized logging and metrics monitoring with Prometheus, Grafana, and OpenSearch.
- Reduced cloud spend by 38% via Kubernetes cluster auto-scaling and spot instance optimization.

EDUCATION

B.S. in Computer Engineering, University of Texas at Austin (2016)
