Abhinav Sharma

Senior Cloud DevOps Engineer

Email: **abhinavclouds@gmail.com** | Phone: +1 (555) 721-8890 | Location: San Francisco, CA (Remote)

PROFESSIONAL SUMMARY

Senior Cloud DevOps Engineer with 8+ years designing high-availability multi-region cloud infrastructures on AWS and GCP. Expert in Infrastructure as Code (Terraform), Kubernetes cluster orchestration, zero-downtime deployment strategies, and enterprise GitOps with ArgoCD.

TECHNICAL PROFICIENCIES

Key Skills: AWS ? GCP ? Kubernetes ? Docker ? Terraform ? ArgoCD ? GitHub Actions ? Prometheus ? Grafana ? Helm ? Python ? Bash ? Linux Internals

PROFESSIONAL EXPERIENCE

Staff Cloud Infrastructure & DevOps Lead | *CloudScale Platforms Inc.* (2022 - Present)

? Architected multi-region AWS EKS Kubernetes clusters serving 120M daily API requests with 99.99% uptime SLA.

? Automated end-to-end GitOps deployment pipelines using ArgoCD and GitHub Actions, cutting release cycles from 4 hours to 8 minutes.

? Reduced monthly AWS infrastructure spend by 34% ($48,000/mo) through spot instance optimization and Karpenter auto-scaling.

? Engineered multi-region disaster recovery replication with Route 53 latency routing and cross-region Aurora PostgreSQL failover.

Senior DevOps Engineer | *Vanguard Cloud Systems* (2018 - 2022)

? Migrated 40+ containerized microservices from legacy on-premise hardware to Google Cloud Platform (GKE).

? Authored reusable Terraform modules adopted across 12 product engineering teams for compliant cloud provisioning.

? Implemented centralized logging and observability stacks utilizing Prometheus, Thanos, and Grafana Loki.

EDUCATION

B.S. in Computer Science, Carnegie Mellon University (2018)
