Abhinav Gupta

Senior Backend Systems Engineer (Python)

Email: **abhinavclouds@gmail.com** | Phone: +1 (555) 441-2390 | Location: New York, NY (Remote)

PROFESSIONAL SUMMARY

Senior Backend Engineer with 8 years mastering asynchronous Python (FastAPI, AsyncIO, Celery), PostgreSQL database internals, Redis caching, and distributed architecture. Proven history designing high-throughput APIs serving 50k+ requests per second.

TECHNICAL PROFICIENCIES

Key Skills: Python 3.12 ? FastAPI ? AsyncIO ? PostgreSQL ? SQLAlchemy ? Redis ? Celery ? Kafka ? Docker ? Pytest ? REST / gRPC ? System Architecture

PROFESSIONAL EXPERIENCE

Staff Backend Engineer | *Nexus Financial Core* (2021 - Present)

? Engineered core ledger settlement API with Python FastAPI and PostgreSQL processing $12M daily transactions.

? Optimized database connection pooling and query plans, reducing p99 API latency from 180ms to 24ms.

? Constructed asynchronous task worker pipeline using Celery and Redis with distributed locking and idempotent retries.

? Maintained 95%+ test coverage across 80,000 lines of Python code using Pytest and factory patterns.

Backend Software Engineer | *DataPoint Technologies* (2017 - 2021)

? Designed RESTful microservices with Django and FastAPI supporting 500,000 mobile app users.

? Implemented Redis cache layer with cache-aside and write-through strategies, slashing DB query load by 70%.

EDUCATION

B.S. in Computer Science, Columbia University (2017)
