Abhinav S.

Cloud Security & Zero-Trust Architecture Lead

Email: **abhinavclouds@gmail.com** | Phone: +1 (555) 712-3456 | Location: Denver, CO (Remote)

PROFESSIONAL SUMMARY

Cloud Security Architect with 9 years hardening enterprise cloud environments across AWS and GCP. Deep expertise in Zero Trust network architectures, HashiCorp Vault secrets management, IAM least-privilege automation, and SOC2 / ISO-27001 compliance.

TECHNICAL PROFICIENCIES

Key Skills: Cloud Security ? AWS IAM ? HashiCorp Vault ? Zero Trust ? Istio mTLS ? SOC2 Compliance ? Trivy / Snyk ? Terraform ? Kubernetes Hardening ? Python ? Incident Response

PROFESSIONAL EXPERIENCE

Head of Cloud Security Architecture | *Fortress Cloud Security* (2021 - Present)

? Enforced Zero Trust security posture with mTLS service-to-service communication using Istio and HashiCorp Vault dynamic secrets.

? Constructed hardened CI/CD deployment pipelines with automated container vulnerability scanning (Trivy), preventing high-severity CVE deployments.

? Automated IAM least-privilege policy pruning using AWS Access Analyzer and custom Python audit lambdas.

? Directed SOC2 Type II compliance audit, successfully certifying identity governance, audit logging, and cryptographic data isolation.

Senior Security Engineer | *Apex Cloud Systems* (2016 - 2021)

? Configured AWS Security Hub, GuardDuty, and centralized SIEM ingestion into Splunk.

? Conducted regular penetration testing and red-team adversary simulations on production cloud perimeters.

EDUCATION

B.S. in Computer Engineering, University of Texas at Austin (2016)
